NIGHT VISION CONFIGURATION

DAY-TIME CONFIGURATION

With a simple twist of the eyepiece operator can remove the daytime riflescope eyepiece and replace it with a Night Vision eyepiece converting your scope into a high quality, very accurate night vision weapon sight.

The Night Vision eyepiece utilizes a US Gen 2 or Gen.3 Light Intensifier Tube (same as served in operation Iraqi Freedom). **This ingenious setup allows the shooter to go from day to night in less then 30 seconds without tools, without changes in eye relief and remain zeroed all around the clock.** A separate, removable, most powerful in the world (450mW) long-range Infrared Illuminator is also included to provide the user with total darkness capability. Furthermore the US government granted ATN with a patent for the feature that prevents Tube burn by the illuminated reticle.

Scope comes complete with all-necessary batteries, remote control for infrared illuminator, 6 Interchangeable Cams, sunshade, instruction manual and custom 42 mm mounting rings.
