SPOTTING SCOPE

MO3-2D

If you are in the market for an inexpensive 2nd gen night vision spotting scope which is compact and powerful, we would like to introduce you to the MO3-2D spotting scope.

The MO3-2D utilizes a D-grade light intensifier tube to achieve its low price.

D-grade tubes are tubes that did not pass our tube certification test typically do to too many cosmetic imperfections on the tube. These imperfections are normally seen as black spots in the viewing area. These blemishes do not affect the light gain, or lifespan of the tube. Our D rated tubes are backed by a 1 year limited warranty. The MO3-2D is equipped with a built-in infra-red illuminator for total darkness viewing. Plus, with numerous accessories available (90mm lens and doubler for 4x and 8x magnification, Universal camera and camcorder adapter, Long Range and IR-450 infra red illuminators) the MO3-2D is one of the most versatile least expensive 2nd generation units on the market.
