ATN 5X33 L LIT-RETICLE RIFLESCOPE

ATN 5X33L
ILLUMINATED RETICLE

The name says all. Designed specifically for .223 caliber the ATN 5X33L Pro is simply the best illuminated reticle scope for AR-15 and M16 modifications. User friendly by design, the ATN Professional 5x33L is simple to use while sporting some of the most advanced features available today.

Accuracy was our number one priority when designing the ATN Professional. Featuring 1/8 M.O.A. windage and elevation click adjustments, the ATN Professional offers twice the precision of scopes with M.O.A. adjustments. Combine our precision windage and elevation adjustments with a 500 yard range finder and a bullet drop compensator and you now have a scope that will satisfy even the most demanding Marksman.

You will never lose sight of your crosshairs due to darkness while using the ATN Professional. Our illuminated reticle has a 10 position rheostat. The intensity of the reticle can be adjusted to your specific lighting conditions. Two revolutionary new lens coatings add even more value to this feature packed scope. The Everlight™ and Proshield™ lens coatings were designed to help prevent glare and scratches, while providing you with a sharp image in both bright and low light conditions.

When it comes to value you will have to agree the ATN Professional 5x33L is the best Illuminated Reticle Rifle scope for your dollar.
