

REFLEX SIGHT

DIGITAL ULTRA SIGHT

The Digital Ultra Sight by ATN is designed to be a both eyes open, heads-up, rapid acquisition reflex sight with a New revolutionary feature called MultiAim. MultiAim makes the ATNc Digital Ultra Sight the only sight on the market where the user can, with a push of a button, instantaneously change the reticle pattern of the sight without a shift in the point of impact. Digitally controlled Multi-Aim allows an array of features such as 5-reticle configurations, reticle brightness adjustments, brightness level memory, reticle pattern memory and low battery indication. Since there are no movable parts the reliability of the device is greater than standard reflex sights.

- Multi Reticle System
- High intensity diodes for super bright reticle
- Instant target acquisition
- Parallax free
- Heads-up display for extra wide field of view
- Efficient electrical design for long battery life
- Optional bright light filter
- Two year limited warranty
