

TACTICAL FLASHLIGHT

J125W

The ATN Javelin Series J125W Tactical Flashlight can be carried by hand or attached to a weapon by a mount. This device is suitable for SWAT team missions or by users during aggressive sports.

The J125W has a modular bezel in front, which can be used as an attacking bezel by Law Enforcement personnel or as a defensive tool. It can also be used as a powerful defensive flashlight. In a dark atmosphere, if a suspect or attacker is afflicted by the 200 lumens of the J125W flashlight, they will experience 10 seconds of transient blindness. Law Enforcement personnel can use the high light and bezel as an advantage during close quarter combat.

The J125W is an anti-shock flashlight. It has a shockproof lamp assembly with triple anti-shock springs that can endure the repeated recoil of large caliber weapons. This helps prevent damages to the lamp and prevents the reduction of the lamp life.

- Powerful 200 Lumens
- Aircraft grade aluminum
- Twist for constant on or tailcap button for momentary on
- LED bulb systems
- Flawless white beam
- Anti shock bulb system
- Striking/defensive bezel
- Picatinny weapon mount
